

Jindal Business Responsibility Policies

Principle-6

Safeguarding the Environment

Philosophy:

Jindal Worldwide Limited (JWL) is committed to running its business in a responsible, environmentally sound and sustainable manner. It sets high standards in the area of environmental responsibility — striving for performance that does not merely comply with regulations but reduces environmental impacts. JWL believes that it has a responsibility to take care of the planet and preserve its beauty, resources and strength for future generations.

Policy:

- To utilize natural and manmade resources in an optimal and responsible manner and ensure the sustainability of resources by reducing, reusing, recycling and managing waste.
- To take measures to check and prevent pollution which should assess the environmental damage and bear the cost of pollution abatement with due regard to public interest.
- To ensuring that benefits arising out of access and commercialization of biological and other natural resources and associated traditional knowledge are shared equitably.
- To continuously seek for improvement in environmental performance by adopting cleaner production methods, promoting use of energy efficient and environment friendly technologies and use of renewable energy.
- To develop Environment Management Systems (EMS) and contingency plans and processes that help in preventing, mitigating and controlling environmental damages and disasters, which may be caused due to operations or that of a member of value chain.
- To report environmental performance, including the assessment of potential environmental risks associated with operations, to the stakeholders in a fair and transparent manner.
- To proactively persuade and support the value chain to adopt this principle.

Other Guidelines:

- The Company understands its responsibility towards the environment and endeavours to continuously promote environmental sustainability, ecological balance, conservation of natural resources and maintaining the quality of soil, air and water.
- The Company shall use energy and natural resources wisely and efficiently, eliminate and minimise waste, and re-use and recycle wherever practical and possible.
- The Company shall ensure that environmental issues are properly assessed and considered when key decisions are taken about supply chains, processes and new product development.
- This policy will be reviewed on a regular basis to evaluate continued relevance and to monitor compliance.
